## ABOUT ME

Hey, I'm Matteo – a soon-to-be graduate of a software development apprenticeship with a strong passion for Web3 and the decentralized future. I'm one of the few blockchain-focused apprentices in Switzerland, and over the past few years I've been diving deep into everything from frontend frameworks to smart contracts.

I love building things that are both clean under the hood and intuitive to use. Whether it's a slick user interface in React or a simple Solidity contract deployed on a testnet, I'm all about learning by doing and I'm always looking for ways to improve my craft.

## EMPLOYMENT HISTORY

**2021–  
present**

### **Developer in Training, TIE International - Zug, CH**

- Worked on real-world web applications with a focus on clean UI and frontend development using React, Next.js and TypeScript
- International work in NYC
- Participation in blockchain in-depth courses
- Achieved 2nd place in a hackathon for an iOS app with AI integration built in under 24 hours
